SUGGESTED IDENTIFICATION

U. S. Bureau of the Census. *U. S. Census of Business: 1948. Vol. VII: Service Trade—Area Statistics.*
U. S. Government Printing Office, Washington 25, D. C., 1951

This volume replaces the 1948 Census of Business Area Bulletins, Series 1-S.

PREFACE

This is one of a series of seven volumes presenting final results of the 1948 Census of Business for Retail, Wholesale, and Service Trades. Statistics for the Service Trades are contained in two volumes: Volume VI, General Statistics, and this volume on Area Statistics. The Census, which was conducted by personal canvass of business establishments, was taken in accordance with the provisions of the act of June 19, 1948 (62 Stat. 478; 13 U. S. C. 121-123). This act provides for a census of business to cover the year 1948 and every fifth year thereafter. Previous business censuses covered the years 1929, 1933, 1935, and 1939.

Important factors in the conduct of the 1948 Census of Business were the assistance of many private and public organizations in the planning phase of the census and the excellent cooperation of some 3 million business establishments in supplying the information required, as well as the work of the several thousand census employees who participated in the field enumeration, editing, tabulation, and other census operations.

The advice of trade associations, individual businessmen, research and marketing organizations, and Government agencies was invaluable in determining the feasibility of collecting various types of data and the methods for minimizing the burden of reporting, as well as in determining the types of information which would be of greatest value. Because of budgetary and other limitations, it was not possible to collect all of the data recommended by these groups. The timely publicity given to the business census by business organizations, trade papers, local newspapers, and radio stations aided greatly in informing businessmen of the nature and objectives of the census and facilitated the collection of census reports.

The primary responsibility for the 1948 Census of Business was centered in the Business Division of the Census Bureau. Other Divisions of the Bureau, particularly the Field Division and the Machine Tabulation Division, also had important functions in the census.

The business census was taken under the supervision of William C. Truppner, Chief of the Business Division. Major contributions to the planning of the 1948 Census of Business were made by William A. Ruff, Assistant Chief, who retired January 1, 1948, and Earl D. Krickbaum, Chief of the Procedures and Processing Section until November 1, 1948.

The following personnel in the Business Division had important responsibilities in the census:

Harvey Kailin was Assistant Chief, Program Branch. Louis Greenberg was responsible for review of all text material and table forms, and assisted on publication problems.

Max A. Bershad was Chief of the Statistical Methods Section. Henry Wulff, in charge of Quality Control, worked on field enumerating techniques, and office editing and tabulating procedures. Aaron Sabghir, in charge of Sampling Techniques, worked on the post-enumeration survey and measures of census coverage and accuracy.

Ralph C. Janoschka was Chief of the Service Trade Section and Marguerite V. Schneeberger was Assistant Chief. Members of the Service Trade Section chiefly responsible for preparing text and handling technical problems in the processing of reports and tabulations were W. Richard Boyce, Samuel Schechter, Joseph Berg, and Florence Butt.

M. D. Bingham was Chief of the Procedures and Processing Section, and Louis Greenberg was Assistant Chief. Richard S. McCurdy, succeeded by R. M. Micoly in July 1949, and assisted by Jervis Braunstein, was in charge of the Directory Subsection, responsible for receiving report forms and the handling of special problems connected with multiunit firms. Katrina C. Morse, succeeded by Emerson Tubbs in July 1950, was Chief of the Service Trade Processing Subsection, and was in charge of editing, coding, and tabulating Service Trade reports. J. Stanley Werking participated in the design of forms and all problems of printing and preparation of material for publication.

In the Field Division, Jack B. Robertson, assisted by Arthur Cook, directed the field work for the Census of Business. Lancelot W. Armstrong, Machine Tabulation Division, assisted by Betty J. Shockey, was responsible for machine tabulation techniques and procedures, and Franklin L. Thatcher and Robert H. Brooks, Administrative Services Division, were responsible for the printing and publishing of the Census of Business.

APRIL 1951.

OTHER 1948 CENSUS OF BUSINESS VOLUMES*

Volume I: RETAIL TRADE—GENERAL STATISTICS, PART I

Chapter

1. United States Summary.
2. Sales Size.
3. Single and Multiunits.
4. Employee Size.
5. City Size.

Chapter

6. Legal Form of Organization.
7. Warehouses, Other Auxiliary Units.
8. Miscellaneous.
9. Territories (Alaska and Hawaii).

Volume II: RETAIL TRADE—GENERAL STATISTICS, PART 2, AND MERCHANDISE LINE SALES STATISTICS

10. Merchandise Inventories.
11. Credit.
12. Selected Types of Operation.
13. Employment and Pay Roll.
14. Trucks.
15. Miscellaneous.
16. Merchandise Line Sales—Food Group.
17. Merchandise Line Sales—Eating and Drinking Places.
18. Merchandise Line Sales—General Merchandise Group, General Stores.

19. Merchandise Line Sales—Apparel Group.
20. Merchandise Line Sales—Furniture, Furnishings, Appliance Group.
21. Merchandise Line Sales—Automotive Group and Gasoline Service Stations.
22. Merchandise Line Sales—Lumber, Building, Hardware Group.
23. Merchandise Line Sales—Drug and Proprietary Stores.
24. Merchandise Line Sales—Miscellaneous Kinds of Business.

Volume III: RETAIL TRADE—AREA STATISTICS

United States Summary.

Area Statistics—Consists of 50 Chapters: One for each State, one

for the District of Columbia, and one for Territories (Alaska and Hawaii).

Volume IV: WHOLESALE TRADE—GENERAL STATISTICS AND COMMODITY LINE SALES STATISTICS

Chapter

1. United States Summary.
2. Sales Size and Operating Expenses.
3. Credit.
4. Sales by Class of Customer.
5. Legal Form of Organization.
6. Employee Size.
7. Trucks.
8. Miscellaneous General Statistics.
9. Territories (Alaska and Hawaii).

Chapter

10. Commodity Line Sales—United States, By Type of Operation and Kind of Business.
11. Commodity Line Sales—Merchant Wholesalers—Geographic Divisions.
12. Commodity Line Sales—Manufacturers' Sales Branches (With Stocks)—Geographic Divisions.
13. Commodity Line Sales—Assemblers (Mainly Farm Products)—Geographic Divisions.
14. Petroleum Bulk Stations and Terminals.

Volume V: WHOLESALE TRADE—AREA STATISTICS

United States Summary.

Area Statistics—Consists of 50 Chapters: One for each State, one

for the District of Columbia, and one for Territories (Alaska and Hawaii).

Volume VI: SERVICE TRADE—GENERAL STATISTICS

Chapter

1. United States Summary.
2. Receipts Size.
3. Employee Size.
4. City Size.
5. Legal Form of Organization.
6. Trucks.
7. City Statistics.

Chapter

8. Laundries, Cleaning and Dyeing Plants, and Related Services.
9. Amusements.
10. Hotels.
11. Tourist Courts.
12. Automobile Repair Services and Garages.
13. Miscellaneous.
14. Territories (Alaska and Hawaii).

INTRODUCTION

Scope of the census and area covered.—The 1948 Census of Business covers Retail, Wholesale, and Service Trades. Retail and Wholesale Trades in the Business Census correspond with minor exceptions to these Trade Divisions as described in the Standard Industrial Classification Manual, issued May 1949, under the sponsorship of the division of Statistical Standards, Bureau of the Budget. The portion of the Service Division of the Standard Industrial Classification Manual covered by the census is indicated below in "Scope of Service Trade." All previous Business Censuses covered Retail and Wholesale Trades; Service Trades were first enumerated in the 1933 Census.

The 1948 Census of Business includes business establishments located in Continental United States and the Territories of Alaska and Hawaii. Data for Puerto Rico, obtained in a Census of Business for 1949, are published separately. The 1939 Business Census covered the same areas as the 1948 Census, and, in addition, Puerto Rico. All earlier Business Censuses were conducted only in Continental United States.

Period covered by the census.—The 1948 Census of Business is basically a report of business activity in the calendar year 1948. However, the relatively small proportion of establishments which maintained their records on a fiscal year basis and were unable to report on a calendar year basis, were permitted to use a fiscal year ending between September 30, 1948, and March 31, 1949. In a very few cases, reports were accepted for fiscal years not falling within this range. Regardless of the fiscal year used, all establishments were required to report employment and pay roll (except annual pay roll) for the pay periods specified on the report forms.

Method of canvass.—The 1948 Census of Business was conducted primarily by means of field enumeration, although advance inquiries were made by mail to clarify the reporting of large multiunit organizations. For purposes of enumeration, 308 Census field offices were established with jurisdiction over the some 37,000 enumeration districts into which the Nation had been divided. Trained enumerators were assigned areas consisting of one or more enumeration districts. A more complete description of enumeration procedures, including controls on and measures of the coverage of business establishments, is contained in 1948 Census of Business, Volume I, Retail Trade; Volume IV, Wholesale Trade; and Volume VI, Service Trade.

Scope of Service Trade.—The Standard Industrial Classification (S. I. C.) Manual describes the Services Division as including "establishments primarily engaged

in rendering a wide variety of services to individuals and business establishments." Of the 15 major groups included in this division, the scope of the 1948 Census of Business includes the following 5 S. I. C. major groups, essentially in their entirety:

- 72. Personal services.
- 73. Miscellaneous business services.
- 75. Automobile repair services and garages.
- 76. Miscellaneous repair services.
- 79. Amusement and recreation services, except motion pictures.

Of the S. I. C. Major Group 70, "Hotels, rooming houses, camps, and other lodging places," the Business Census includes only hotels having six or more guest rooms and tourist courts having three or more rental units. Of the S. I. C. Major Group 78, "Motion pictures," the Service Trade portion of the Business Census includes only Industry 7831, "Motion picture theaters."

The following major groups of the Services Division, as presented in the Standard Industrial Classification Manual, are excluded in their entirety from the scope of this Census:

- 77. Radio broadcasting (including facsimile broadcasting) and television.
- 80. Medical and other health services.
- 81. Legal services.
- 82. Educational services.
- 84. Museums, art galleries, and botanical and zoological gardens.
- 86. Nonprofit membership organizations.
- 88. Private households.
- 89. Miscellaneous services.

Comparison of 1948 and 1939 Service Trade scope.

The most significant changes in scope of the Service phase of the Census of Business for 1948 from the scope of the 1939 Census are exclusion (in whole or in substantial part) of the 1939 Census groups entitled "Services allied to transportation" and "Custom industries" (including small manufacturing plants). Figures for 1939, as presented in this volume, have been adjusted to reflect these changes. Following is a list of the kinds of business in the 1939 Business Census which have been omitted from the 1948 Census:

Custom industries (including small manufacturing plants)

- Awning and tent manufacturing establishments (including repair).
- Bookbinding establishments.
- Bottling works.
- Cabinetmaking shops (including woodworking).
- Cider mills and presses.
- Grist mills.
- Slaughtering establishments.
- Machine shops (unless engaged 100 percent in repair work).
- Metal-plating shops.

Customs industries—Continued

- Neon-sign manufacturing establishments (including repairs).
- Printing and publishing shops.
- Sawmills and planing mills (including contract logging).
- Tinsmith shops (unless engaged 100 percent in repair work other than construction repair).
- Tire retreading shops (on a factory basis).
- Wearing apparel contract work shops.
- Welding shops (unless engaged primarily in repair work).

Services allied to transportation

- Packing and crating service.
- Stevedoring service.
- Stockyard service.
- Warehousing, cold storage.
- Warehousing, cotton.
- Warehousing, farm products.
- Warehousing, other.
- Weighing service.

Other businesses

- Boat repair.
- Circulating libraries.
- Cotton compresses.
- Dental laboratories.
- Landscape gardening and tree surgery service.
- Livery stables.
- Travel bureaus (including ticket agents and brokers).

In addition to these omissions, a limited number of changes in definitions for individual kinds of business have been made between 1939 and 1948. These changes are described fully in the descriptions of the kind-of-business classifications shown in appendix A. Appendix B summarizes the comparisons between the 1948 classifications and the corresponding 1939 classifications.

Establishment basis of the census, and kind-of-business classification.—Census of Business figures represent a summary of reports for individual "establishments" rather than for the combined activities of "companies." A separate report was obtained for each location at which business was conducted, including each location of multiunit organizations. Each report was tabulated in accordance with the physical location of the establishment. In addition to being classified on the basis of location, the report for each establishment was assigned a kind-of-business classification on the basis of the primary activity of the establishment during the census year. See appendix A for further explanation and listing of kind-of-business classifications.

Report forms.—Five report forms were used for enumerating Service Trade establishments. These were required because of the diversity of kinds of business included in this field. While, in most kinds of business, establishments were able to report on the general form (BC-40), special forms were designed for Hotels and Tourist Courts (BC-41), establishments in the Amusement field (BC-42), Automobile Repair Services and Garages (BC-43), and Laundries, Cleaning and Dyeing Plants, and Related Services (BC-47). Copies of these forms will be found in appendix D.

Statistics for the Service Trades.—The statistics contained in this volume previously have been published in a series of Service Trade Area Bulletins consisting of a separate Bulletin for each State and the District of Columbia, combined Service-Retail-Wholesale Bulletins

for the Territories of Alaska and Hawaii, and a United States Summary Bulletin. The number of kinds of business for which data are published varies with the size of the area, measured in terms of number of establishments, for which the data are presented. In addition, information is limited by provisions of Census Law which are directed at preventing disclosure of figures for individual businesses.

Greatest kind-of-business detail is provided for the United States, geographic divisions, States, and the large standard metropolitan areas. Data for major groupings of service trades, and for certain individual trades, are shown for each city and county with 400 establishments or more and the smaller standard metropolitan areas. Data for major service trade groups only (except Tourist Courts) are shown for all counties and for cities of 2,500 inhabitants or more. Tourist Court data are shown only for States, counties, and metropolitan areas. The statistical material contained in this volume is limited to basic information on number of establishments, receipts, pay roll, employees, proprietors, unpaid family workers, number of hotel guest rooms, and number of tourist court rental units, all presented by area and kind of business.

Information on a number of additional subjects is presented in other Census of Business volumes. Contents of these volumes are listed on page vi.

Standard metropolitan areas.—In addition to States, counties, and cities, Census of Business statistics are presented for standard metropolitan areas. These are areas which have been defined and established cooperatively by a number of interested Federal agencies under the direction of the Bureau of the Budget for purposes of compilation and presentation of a wide variety of statistical data on a uniform area basis.

The general concept adopted in defining a standard metropolitan area was one of an integrated economic unit with a large volume of daily travel and communication between a central city and the outlying parts of the area. This resulted in an area considerably more restricted, especially for the larger cities, than the market or trading area. Each area (except in New England) consists of one or more entire counties. In New England, metropolitan areas have been defined on a town rather than on a county basis. A complete statement of the principles adopted as a guide in applying this general concept to the definition of individual areas will be found in a document issued by the Bureau of the Budget, Executive Office of the President, dated July 28, 1950, entitled "Standard Metropolitan Area Definitions."

The 147 standard metropolitan areas for which 1948 Census of Business data are included in the Area Statistics Volumes are those defined by the Bureau of the Budget as of June 5, 1950, on the basis of 1950 population statistics available at that time. Subsequent to the preparation of Census of Business tabulations, the list of metropolitan areas was increased to 168 areas. The list of 147 standard metropolitan areas included in the

Census of Business and the description of the territory which they cover will be found on page 0.57. These areas are also shown in the map on page xiv.

Cities of 2,500 inhabitants or more.—The cities included in tables 103A, 103B, and 103C "Counties and Cities With 2,500 Inhabitants or More" were based on unofficial population figures and will differ slightly from the list as determined by the final 1950 Census of Population, which was not available in time for use for

1948 Census of Business purposes. Some cities which had 2,500 inhabitants or more were not included in the above tables, while a few which had less than 2,500 inhabitants have been included. A review of official preliminary 1950 population figures, available at the time of publication of this volume, permitted preparation of a list of those cities of 2,500 inhabitants or more which were not included in the tables. Appendix C lists these cities.

EXPLANATION OF TERMS

Establishments.—Service establishments, hotels, tourist courts, and places of amusement are defined as places of business for which services provide the primary source of receipts. Each unit of a multiunit organization is considered a separate establishment. Service concessions, operated independently in connection with other businesses, are classified as separate establishments.

All establishments, as defined above, were enumerated, regardless of size, but those reporting a full year's operations with receipts amounting to less than \$500 were omitted. In 1939, the corresponding figure was \$100.

The number of establishments in any kind-of-business classification does not necessarily equal the total number engaged in the activity specified, since each establishment is classified on the basis of its major activity.

Guest rooms (hotels).—The number of hotel guest rooms consists of the total number of separate rooms (transient and residential) as of December 31, 1948. Suites of rooms were not counted as units, but as individual rooms (e. g., a three-room suite was counted as three rooms).

Rental units (tourist courts).—Consists of the number of rooms, apartments, single cabins, or other rental units. The number of rental units is not to be confused with the number of cabins, which would be considerably less.

Receipts.—This item consists of receipts during 1948 for services to customers, and also includes receipts from the sale of merchandise, receipts from sale of meals and from fountain service, and receipts from related activities. Receipts do not include amounts not received from customers, such as income from investments, rental of real estate, etc., nor local and State sales taxes or Federal excise taxes collected by the establishment directly from customers, and paid directly to the local, State, or Federal taxing agency. Gasoline, liquor, tobacco, and those other excise taxes which are paid by the manufacturer or wholesaler and passed along to the reporting establishment are included.

Service establishments such as credit and collection agencies, interior decorators, auctioneers, and printing brokers transfer monies or merchandise incidental to the service they provide. Only service charges are included in service receipts. Receipts of advertising agencies exclude media costs.

Taxes (amusements).—Consists of Federal, State, and local amusement, sales, and excise taxes collected directly from the customer and paid directly to the taxing agency.

Pay roll.—Consists of all compensation (salaries, wages, commissions, and bonuses) paid during the specified period to all employees. For corporations, it includes amounts paid to officers and executives; it does not include compensation for proprietors or firm members of unincorporated businesses. Pay roll is reported before deduction for social security, income tax withholding, insurance, dues, etc.

Pay roll—entire year.—All amounts paid during the census year to employees are included in this item.

Pay roll—specified workweeks.—Includes all amounts paid to employees on pay rolls for the workweek ending nearest March 15, July 15, and November 15. Provision was made for reporting pay roll adjusted to the workweek, where the pay period was on other than a workweek basis, and for reporting, on a workweek basis, commission and bonus payments. However, for some establishments annual payroll included amounts not allocated to weekly payrolls. Full workweek pay rolls consists of pay received for the specified pay periods by employees defined below as "Full workweek employees."

Active proprietors of unincorporated businesses.—Consists of owners or partners of unincorporated businesses, who devoted the major portion of their time to operation of the business during November 1948.

Unpaid family workers of unincorporated businesses, November.—Unpaid family workers consists of the number of family members (wives, sons, daughters, etc.) who worked in the business during November 1948, but who were not paid a wage or salary. Family workers paid a wage or salary are included in the count of employees and their compensation included in pay roll.

Paid employees.—Paid employees consists of all employees, including salaried officers and executives of corporations, who were on the pay roll for the specified workweek.

Full workweek employees.—Full workweek employees are employees, whether regular or seasonal, who, for the specified pay period, were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

LIST OF CORRECTIONS

This volume has been prepared primarily by assembling and binding the statistical portions of previously issued area bulletins for the United States, States, the District of Columbia, and Territories. This publication plan was adopted to conserve public funds and expedite the issuance of the volume. The corrections appearing below represent changes which would ordinarily have been made if the volume had been prepared by reprinting the contents of all bulletins.

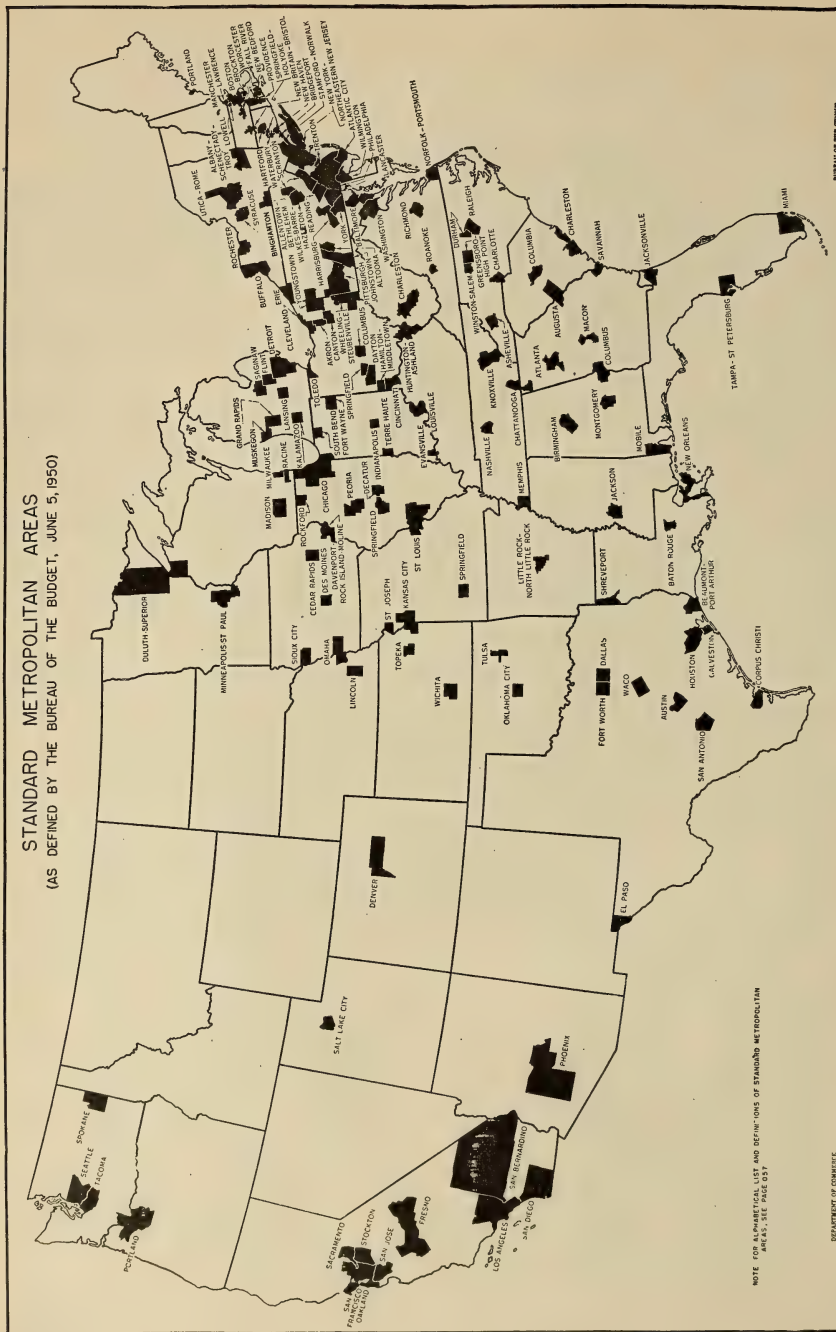

It was found desirable to reprint completely the following bulletins for volume publication: United States Summary, California, Massachusetts, North Carolina, New York, Alaska, and Hawaii. In these cases some figures will differ from those shown in the bulletins as originally issued.

Differences of one in totals for the same item appearing in different tables have not been listed where they are caused by rounding.

["Line" and "Column" indicate the position of the item on a page. Thus "Line 10" means the 10th line from top of the table stub, counting every line on which printing appears regardless of presence of entries in field. "Column 5" means fifth column from the left, not counting the stub column]
